

Cursive Numbers 0-9 Reference

Read the print label, then study the cursive specimen. Cover the model and try a few from memory on separate paper.

0	1	2	3	4
				
5	6	7	8	9
				

Numerals stay separate

These are numeral shapes in the named font, not joined writing or a stroke-order lesson. Choose five digits and copy them below.

Handwriting practice lines consisting of solid top and bottom lines with a dashed midline. There are two sets of these lines for copying practice.

Print at 100% (actual size) on US Letter paper. For practice pages only, fit to A4 is also possible; it makes the writing guides slightly smaller. Font specimens show appearance, not stroke order or a certified school method. A learner who is new to cursive may need an adult to demonstrate a letter.

Personal, household, and one-classroom printing. Do not resell, upload, or redistribute the PDF. Font licenses are attached to the file; no installable font is sold.
